STRUCTURAL STEEL CONSTRUCTIONS 1969

EXTERNAL STEELWORK

## PHARMACY FACADE

Renovation of the facades of a commercial store in Piraeus.

The work required included the construction and installation of a metal frame to support the corner frames with columns, beams and brackets, the construction and installation of a new metal sill on the rear facade of the pharmacy covered with aluminium sheets, the removal of the older panelling of the existing sill on the front facade and construction and installation of a new metal frame and perforated flat aluminium sheets to repanel the existing sill on the front facade.
